

For problems 10 –12, assume FGHI is a parallelogram.

10. Solve for x.

11. Solve for y.

12. Solve for z.

13. Solve for t.

Circle the true statements. If the statement is false, correct it.

14. All squares are rectangles.

15. All rhombuses are squares.

16. All squares are parallelograms.

17. All rectangles are quadrilaterals.

18. All parallelograms have 4 congruent angles.

19. Every single _____, _____, and _____ is a parallelogram.

- The opposite is NOT true!

20. A _____ and a _____ can never be a parallelogram.

STUDY YOUR PROPERTIES OF EACH FIGURE!
